DiskWarrior has successfully built a new optimized directory for the disk named "Serenity." The new directory is ready to replace the original directory.

All file and folder data was easily located.

Comparison of the original and replacement directories indicates that there will be changes to the number, the contents and/or the attributes of the files and folders. It is recommended that you preview the replacement directory and examine the items listed below. All files and folders were compared and a total of 11,402,504 comparison tests were performed.

• Errors, if any, in the directory structure such as tree depth, header node, map nodes, node size, node counts, node links, indexes and more have been repaired.

• 13 files had a directory entry with an incorrect text encoding value that was repaired.

• 1 folder had a directory entry with an incorrect custom icon flag that was repaired.

• 3 folders had a directory entry with an incorrect text encoding value that was repaired.
